

**Strengthening capacities in the Western Balkans
countries to address environmental problems
through remediation of high priority hot spots:
Montenegro country component- Mojkovac Lead
and Zinc Tailing Mine Impound**

Montenegro, 15 - 16, May 2008

Milica Begović Radojevic
Ana Daković
Borko Vulikić

United Nations Development Programme

Spatial planning

Global Environmental Facility (GEF) funded projects

Environmental Geographic Information System (GIS)
for Montenegro

Implementation of the Tourism Master Plan 2007-
2020 Wilderness Hiking and Biking

Remediation and re-cultivation of Lead and Zinc
Tailing Mine Impoundment (TMI) in Mojkovac

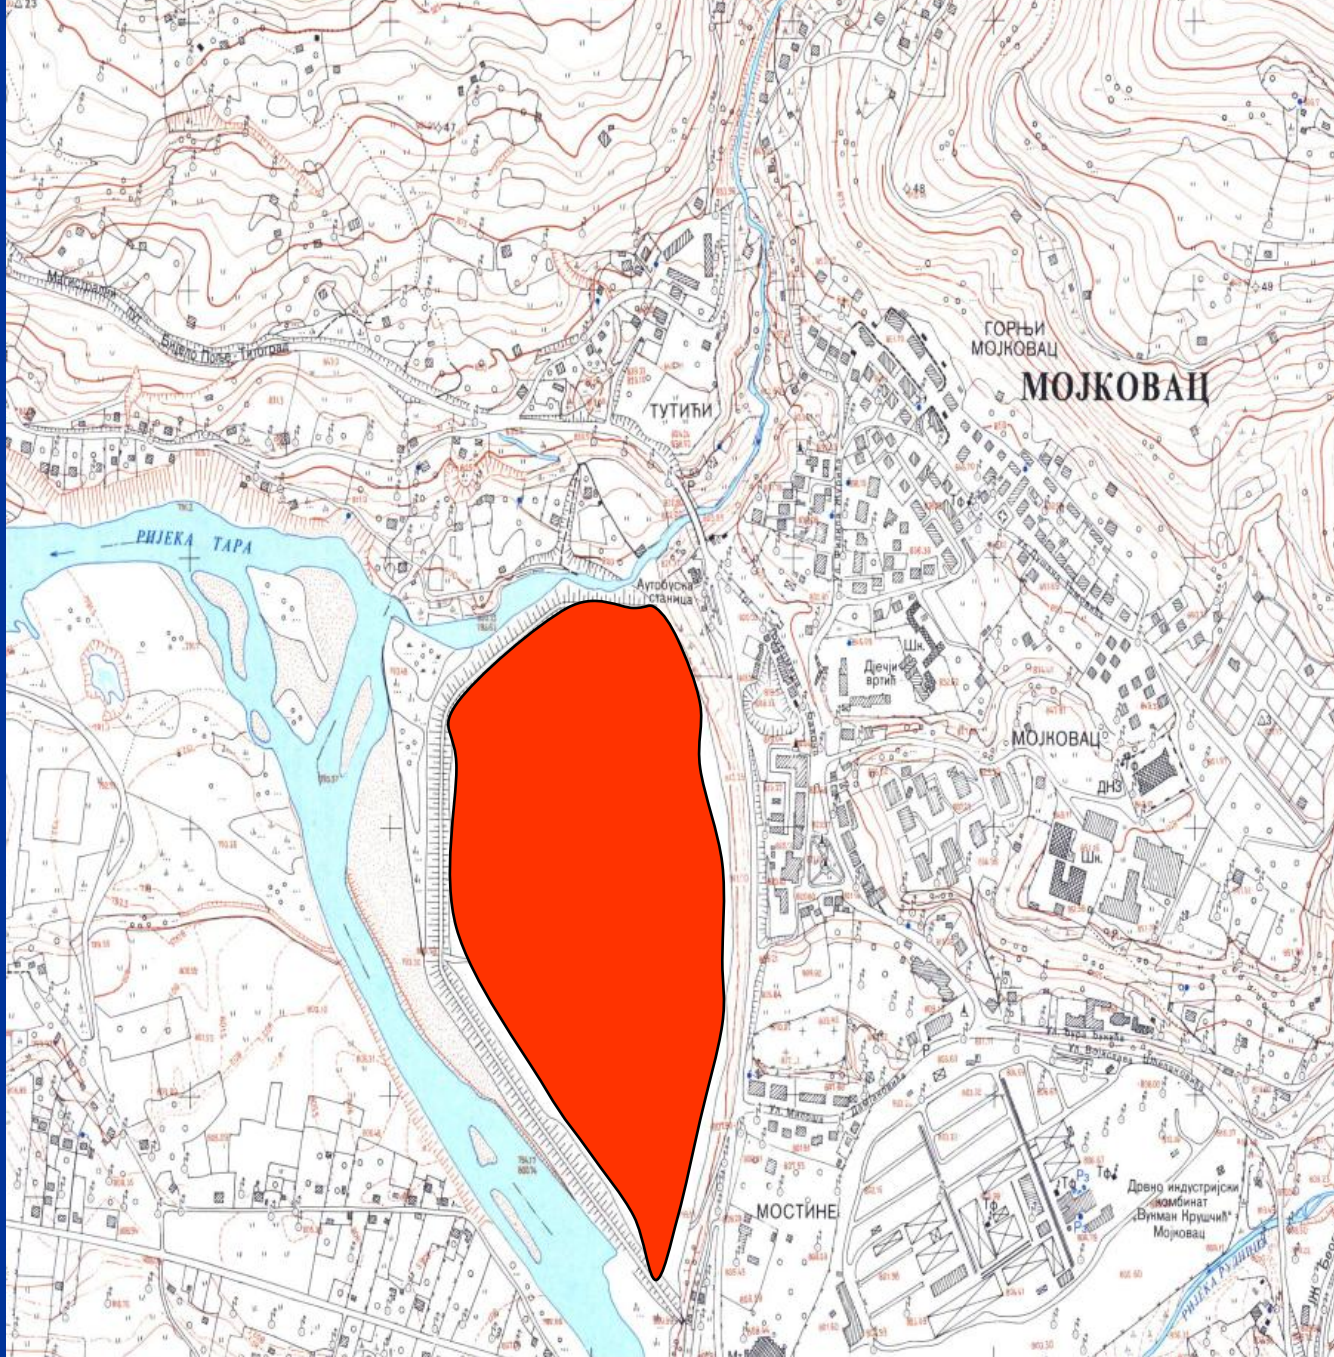

Unemployment rate: north 17.8%
central part 12.8%
south 5,8%

Poverty rate: north 19.3%
central part 10,8%
south 8,8%

Lack of human resources

Infrastructure problems

Problems and risks :

breakdown of dam stability

leaching of muddy and liquid component of the impounded material through bottom and lateral sides

deposing of municipal solid waste

accumulation of surface waters from the urban area of Mojkovac and from the road Kolasin-Mojkovac-Bijelo Polje, and waste water from Mojkovac

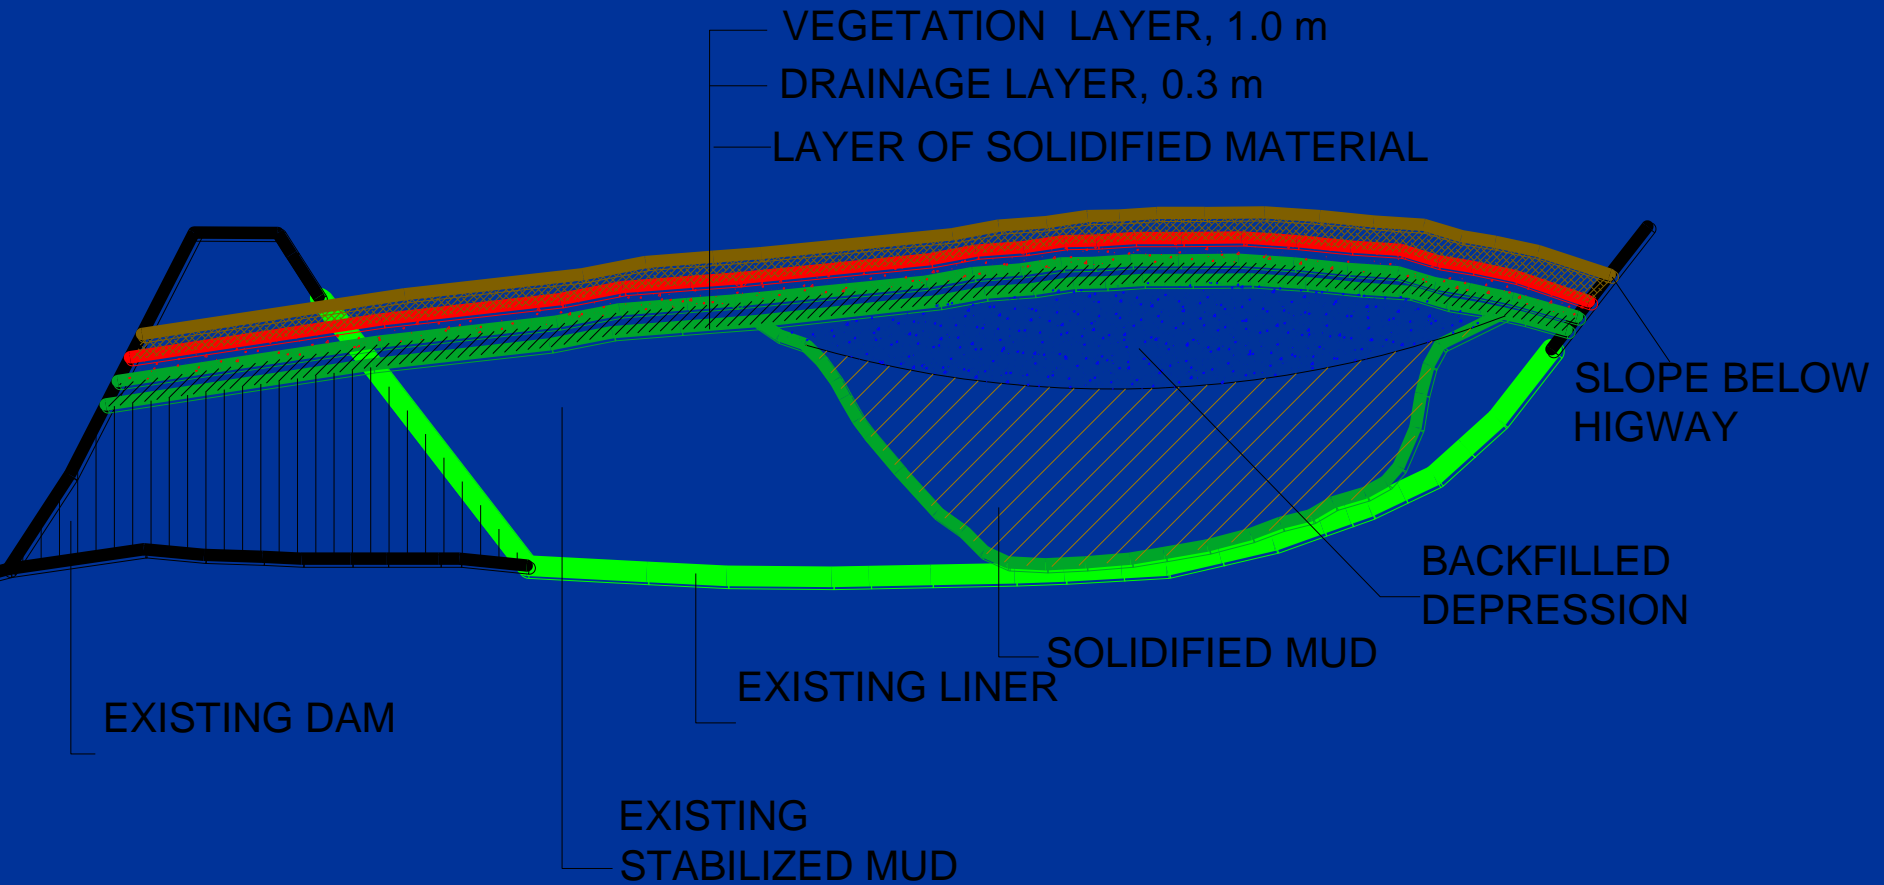

What the end result should be?

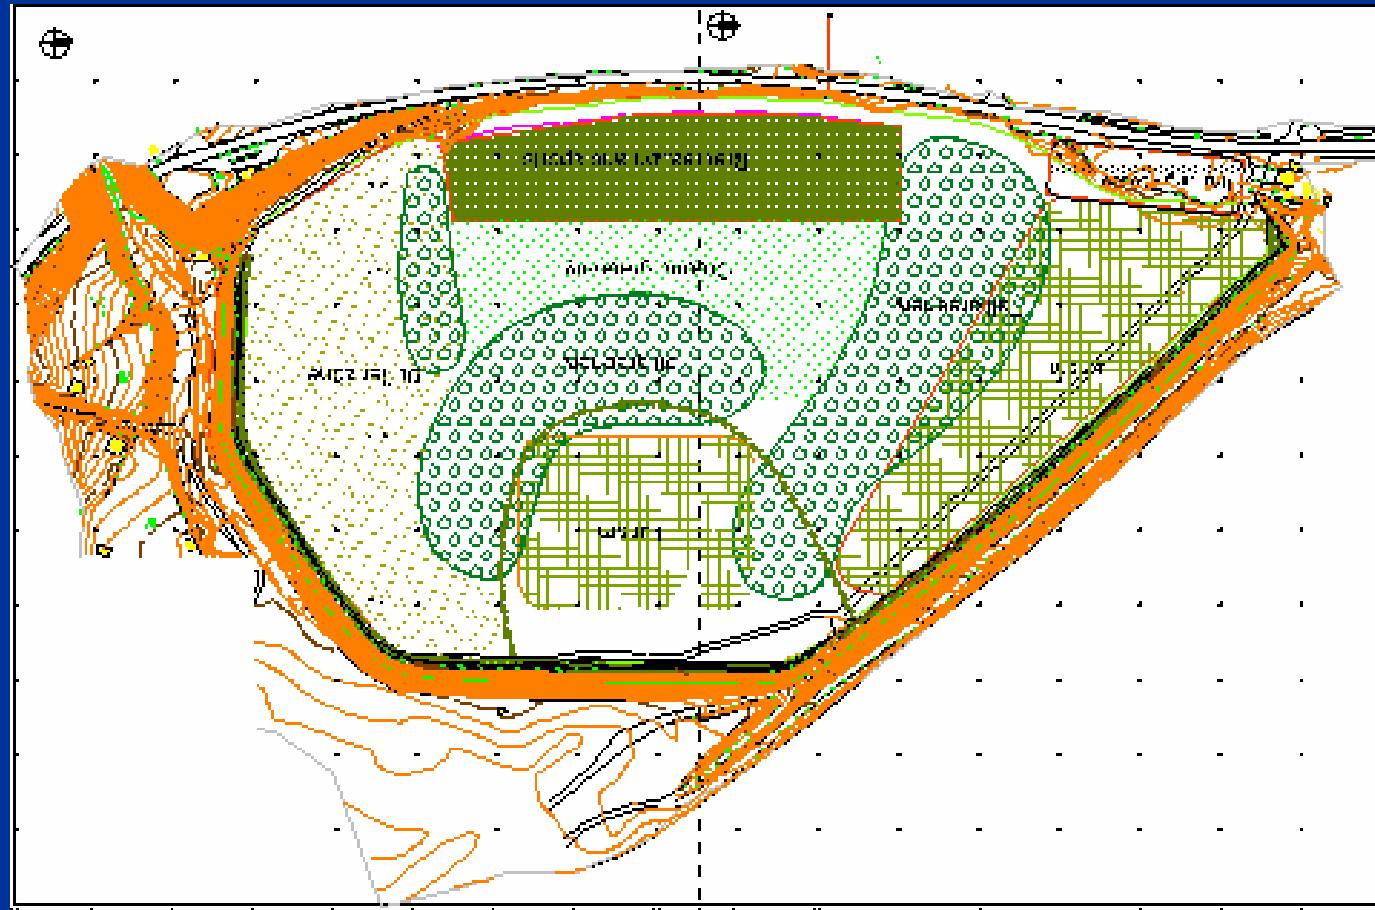

1. HOT SPOT clean up

2. Strengthen the capacity to develop and implement local environmental policies and investment projects

1. HOTSPOT clean up

1. HOT SPOT clean up

2. Strengthen the capacity to develop and implement local environmental policies and investment projects

National Strategy for Sustainable Development

Tourism master plan 2007 till 2020

Strategy for Development of Mojkovac Municipality

2. Strengthen the capacity to develop and implement local environmental policies and investment projects

Agriculture

Tourism

2. Strengthen the capacity to develop and implement local environmental policies and investment projects

Agriculture
