2. Strengthen the capacity to develop and implement local environmental policies and investment projects

Alternative use of the mine: Museum and Underground Biking

Overview of current situation in area of abandoned mining operations

Additional funds secured from the Czech Government for the beginning of that procedure.

Current environmental status and impact on environment and human health of the area surrounding the mine.

This report will provide a basis for any future development of the area regardless of whether it will regard tourism or any other developmental path.

EIA Experience Exchange workshop

Market research

Capacity building plan for 2009

UNDP activities will focus on strengthening capacities both for national and local level in areas identified as highly important for further municipality development.

Special focus will be placed on environmental management policy- SEA and EIA and the municipal absorption and management capacities for the EU integration process in order to adequately prepare for and implement programs in environmental protection, cross border cooperation, and development in general.
