

Challenges/Priorities

Cross-border/regional pollution impact

Coordination of ongoing efforts

Cost effectiveness and share, disseminate and replicate best practices

Financing issue – how to fund regional cooperation and activities

Capacity development (institutional) and public awareness raising

Limited private sector environmental expertise in the region

Building/maintaining project momentum and integrated institutional knowledge

Next steps/concrete actions

Capture, retain and enhance the knowledge base built up in different projects

Enhance networks, improve mechanisms for regional exchange and coordination

Prioritise of interventions on the regional level building on national efforts

Develop sound regional proposals for funding

Build on existing environmental practitioners database and support development of professional services

Combine concrete works with training and outreach programmes to .build capacity and raise awareness
